*the lowest quiz is dropped

To calculate your grade:

- 1) *Calculate your lab percentage:* add up all the points you have earned on lab reports and divide by the total number of points possible, then multiply by 100.
- 2) *Calculate your quiz percentage:* drop the lowest quiz score and add the rest. Then divide by the total number of points possible (20 for each quiz score kept) and multiply by 100.
- 3) *Calculate your overall grade:*
 $(\text{Lab Percentage} \times 0.7) + (\text{Quiz Percentage} \times 0.3) = \text{Overall Percent}$
