**To calculate your grade:**

- 1) **Calculate your lab percentage:** add up all the points you have earned on lab reports and subtract the lowest Report/Discussion grade. Then divide by the total number of points possible (935), and multiply by 100.
- 2) **Calculate your quiz percentage:** drop the lowest quiz score and add the rest. then divide by the total number of points possible (30 for each quiz score kept) and multiply by 100.
- 3) **Calculate your overall percentage:**  

$$(\text{Lab Percentage} \times 0.7) + (\text{Quiz Percentage} \times 0.3) = \text{Overall Percent}$$
 Check your overall percentage against the letter grade guideline to see your final grade.
